# Managing Authentication Prompts

Devices

Authentication requests are linked to each individual device.

Laptop | Cell Phone | Tablet

Frequency

If you log out completely from any device, you will need to authenticate again when logging back in. Additionally, certain actions may trigger additional MFA prompts:

- VPN Access: Accessing systems via a VPN will require re-authentication.
- Incognito Browser Sessions: Using incognito or private browsing modes will prompt additional MFA.
- Network Connectivity Changes: Switching networks may trigger MFA.

RECOMMENDED

Microsoft Authenticator APP
